Art Unit: 3651

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: Buffer for Sheet Finisher.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-13 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-13 of copending Application No. 10/790,001. Although the conflicting claims are not identical, they are not patentably distinct from each other because they do not recite any non-obvious structural distinctions.

Application/Control Number: 10/789,985 Page 3

Art Unit: 3651

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

5. Claims 1-13 are directed to an invention not patentably distinct from claims 1-13 of commonly assigned 10/790,001 (US 2004/0175217). Specifically, both sets of claims are directed to apparatus. Although the claims are not identical, the claims do not recite any non-obvious structural distinctions.

The U.S. Patent and Trademark Office normally will not institute an interference between applications or a patent and an application of common ownership (see MPEP § 2302).

Commonly assigned 10/790,001 (US 2004/0175217), discussed above, would form the basis for a rejection of the noted claims under 35 U.S.C. 103(a) if the commonly assigned case qualifies as prior art under 35 U.S.C. 102(e), (f) or (g) and the conflicting inventions were not commonly owned at the time the invention in this application was made. In order for the examiner to resolve this issue, the assignee can, under 35 U.S.C. 103(c) and 37 CFR 1.78(c), either show that the conflicting inventions were commonly owned at the time the invention in this application was made, or name the prior inventor of the conflicting subject matter.

A showing that the inventions were commonly owned at the time the invention in this application was made will preclude a rejection under 35 U.S.C. 103(a) based upon the commonly assigned case as a reference under 35 U.S.C. 102(f) or (g), or 35 U.S.C. 102(e) for applications filed on or after November 29, 1999.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3651

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-8, and 10-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Uto et al. Uto discloses a sheet processing device that includes a sheet holding portion (53, 54, 58) that includes a linear section (note horizontal portion after the curve section of 54); sheet stacking means (12a); sheet conveying means (41, 41a, 42, 56, and angle of 12a) that includes a first and a second rotary member (56); a receiving stopper (22); sheet processing means that includes a stapler (12); control means (800); and image forming means (100).

Regarding claim 5, the material or article worked on, does not limit an apparatus claim (See MPEP § 2115).

Additionally, the examiner notes the applicant's use of the word "means" throughout the claims. For the purpose of this rejection, the examiner has construed the claims as not invoking 35 USC § 112 6th paragraph. If the applicant wishes to invoke 35 USC § 112 6th paragraph, the applicant should make a formal statement on the record and identify the portions of the specification that recites the structure related to each means plus function recitation.

Finally, the examiner notes the inclusion of functional language throughout the claims. Since the examiner has construed the claims as not invoking 35 USC § 112 6th paragraph, claims containing a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus if the prior art apparatus teaches all the structural limitations of the claims (See MPEP §2114).

Application/Control Number: 10/789,985 Page 5

Art Unit: 3651

8. Claims 1-8 and 10-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Kawano et al. Kawano discloses a sheet processing device that includes a sheet holding portion (19) that includes a linear section (note vertical portion before the curve section of 19); sheet stacking means (22); sheet conveying means (21, 23, 5A, 5B) that includes a first rotary member (5A) and a second rotary member (5B); a receiving stopper (31); sheet processing means that includes a stapler (30); control means (70); and image forming means (see col. 1, line 42).

Regarding claim 5, the material or article worked on, does not limit an apparatus claim (See MPEP § 2115).

Additionally, the examiner notes the applicant's use of the word "means" throughout the claims. For the purpose of this rejection, the examiner has construed the claims as not invoking 35 USC § 112 6th paragraph. If the applicant wishes to invoke 35 USC § 112 6th paragraph, the applicant should make a formal statement on the record and identify the portions of the specification that recites the structure related to each means plus function recitation.

Finally, the examiner notes the inclusion of functional language throughout the claims. Since the examiner has construed the claims as not invoking 35 USC § 112 6th paragraph, claims containing a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus if the prior art apparatus teaches all the structural limitations of the claims (See MPEP §2114).

Conclusion

Art Unit: 3651

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patrick H. Mackey whose telephone number is (571) 272-6916. The examiner can normally be reached on Tuesday-Friday 7:00 a.m. - 5:30 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gene Crawford can be reached on (571) 272-6911. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
